Professional Summary

Full stack Rails engineer with 8 years of experience shipping features, leading projects end to end, and partnering across teams to build reliable web applications.

Experience

Ruby on Rails Developer *May 2022 - July 2026*

Next Glass | Remote

- Built features, refactored code, fixed bugs, and upgraded dependencies across two Rails applications daily.
- Used AI tooling to accelerate feature development and verification without sacrificing code quality.
- Led dozens of projects from start to finish, delivering features on schedule. Partnered closely with the product team to help shape and scope priorities.
- Built and maintained QuickBooks integrations for 350+ breweries.
- Represented our product in cross team design meetings and built an API allowing another team to create orders and organizations in our system.
- Sustained 93%+ test coverage using RSpec and Capybara.
- Monitored and debugged production issues using New Relic, Sentry, and other tools. Rotated on-call for two weeks out of every four.
- Resolved support queue bugs within a 24 hour window and built self-serve tools for the support team, reducing recurring issues from 10+ per week to 1 or 2.
- Mentored junior developers through bi-weekly pairing sessions. Participated in book clubs and tech talks to share learnings across the organization.

Rails/React Developer *May 2018 - Mar 2022*

Retrolux | Boise, ID

- Architected and built features based off of conversations, rough sketches, or mockups for both web and mobile.
- Refactored old code for better performance and user experience.
- Managed beta and production environments for 100% successful deployments.
- Owned and expanded the API data sync between the mobile and web applications.
- Within a year, became the domain expert for both the web and mobile codebases.
- Worked closely with product to create, update, and maintain our two week sprint cycles.

Toolbox

Ruby on Rails	Turbo/Hotwire	Claude/Cursor	Jira
Postgres	Stimulus.js	Github Actions	AWS
Sidekiq	Stimulus Reflex	Circle CI	Sentry
Redis	CSS/Tailwind	New Relic	Cloudflare
RSpec/Minitest	Capybara	Figma	Metabase

Ruby on Rails Developer *Mar 2020 - May 2022*

Safe Access | Remote

- Founding team member that helped grow Safe Access to 1,000,000+ check-ins from 170,000+ users to date.
- Architected and built core functionality to attract first customers.
- Achieved sub 200ms page loads and 90%+ test coverage.

Food Tour Guide *Aug 2017 - Feb 2020*

Indulge Boise | Boise, ID

- Guided up to 16 guests throughout downtown Boise for a three hour curated tour full of food, art, and history.
- Received 35+ five star reviews for the tours I led and the atmosphere I created.
- Went above and beyond doing research on Boise's history. Spending many hours reading books, attending other tours, and visiting all the local museums.

Account Manager/Renewals *Nov 2014 - May 2016*

SurveyMonkey | Portland, OR

- Maintained relationships with sales assisted customers - \$4.3 million in yearly revenue.
- Worked daily with our legal, finance, and sales operation teams to complete contracts, invoice customers, forecast, and track growth.

Education

Immersive Full stack Graduate

Boise CodeWorks | Boise, ID

Full stack immersive program with around 500 hours of programming. Including 4 complete full stack applications.

Bachelor of Arts

Oregon State University | Corvallis, OR

New Media Communications Concentration; Minor in Spanish; Minor in Business and Entrepreneurship
